

# INTEGRATED RISK SOLUTIONS EDUCATION SEMINAR SERIES

THE RISK SERVICES DEPARTMENT PRESENTS:

## Controlling Work Comp Medical Costs Without A Fee Schedule

Wisconsin employers pay more to treat work injuries than those in nearly every other state. Wisconsin is just one of six states without a fee schedule, and employers here are forbidden from directing an injured worker's care. While the fight for medical cost containment continues, what can you do under current law to minimize the impact of Wisconsin's high medical prices on your worker's compensation claims? This seminar will present four expert perspectives on managing the cost of worker's compensation claims in the current environment.

### What You Will Learn

- The anatomy of worker's comp claim financials and how each claim impacts your overall cost.
- Work comp best practices employers can implement today to reduce medical costs.
- Key steps to take on every claim to ensure a good outcome and evade the hospital system trap.
- Innovative ways savvy employers manage ongoing care to mitigate expense without sacrificing employee health.
- Innovative medical cost management strategies, and how to make sure they are being used effectively on your claim.

### The Speakers

**John Tindall**, Director of Client Claim Advocacy, Integrated Risk Solutions

**Dr. Michael Ritter**, Sensia Wellness

**Tess Maier**, MS, RN, BSN, President, Aurum Medical Management

**Bill Felsing**, President & CEO, Trilogy Health Solutions
